

EPCRA OFF-SITE PLAN FOR

Onalaska Municipal Well #10
504 Vilas Street
Onalaska WI 54650

I. FACILITY NAME:

Onalaska Municipal Well #10
504 Vilas Street
Onalaska, WI 54650-3405
608-781-9572
Facility ID # Assigned by WEM: **019836-9**

II. FACILITY COORDINATOR:

Jim Prindle
Utility Supervisor
Telephone Number:
608-781-9545 ext 404 (w)
608-786-1529 (h)

ALTERNATE COORDINATOR:

Glenn Miller
Operator
Telephone Number:
608-781-9545 ext 408 (w)
608-526-2303 (h)

III. CHEMICALS ON SITE; EXTREMELY HAZARDOUS SUBSTANCES

<u>CAS #</u>	<u>Chemical Name/ Trade Name</u>	<u>Max. Amt.</u>	<u>Vul. Zone</u>	<u>Rural/ Urban</u>
7782-50-5	Chlorine	600-lbs.	2.2 mi.	Urban

OTHER HAZARDOUS CHEMICALS:

16961-83-4 Hydroflurosilicic Acid
160 gal. poly tank

IV. PRIMARY EMERGENCY RESPONDERS:

West Central Regional Type I Hazardous Materials Response Team
La Crosse County Type II Hazardous Materials Response Team
Onalaska Water Utility facility personnel
Onalaska Fire Department
Onalaska Police Department
La Crosse County Sheriff's Department
Wisconsin State Patrol
Wisconsin Department of Natural Resources
La Crosse County Emergency Management
Tri-State Ambulance

V. SUPPORT AVAILABLE FROM FACILITY:

Facility Crew can be contacted by radio to support the Onalaska Fire Department. Crew is trained to use and carry portable detectors for chlorine. Hydrite Chemical Co. of La Crosse has a cylinder containment kit. La Crosse Hazardous Materials Response Team has a cylinder containment kit.

OUTSIDE RESOURCES AVAILABLE:

The La Crosse Fire Department serves as the County's Type II Hazardous Materials Response Team. For Type I incidents, contact the West Central Regional Hazardous Materials Response Team through the Wisconsin Emergency Management Duty Officer (800-943-0003).

CHEMTREC	1-800-424-9300
Hydrite Chemical Co.	1-414-792-1450

VI. GENERAL INFORMATION AND ASSUMPTIONS: (Disclaimer)

The vulnerability zones set forth in this Plan are based on the EPA Technical Guidance for Hazards Analysis. The zones are based on a credible worst case scenario and identify the potential area for impact should an air-borne release of a single EHS chemical occur.

The vulnerability zones are NOT intended to be used as a guide for population protection in fire-related incidents. Fire incidents were considered in the development of this plan and the plan provides basic information about the facility for first responders to employ. However, in an actual fire situation at this facility, the Incident Commander is strongly recommended to reference the fire department's own individual agency pre-emergency plans and standard operating procedures as well as the County's Emergency Operations Plan - Annex K: Fire and Rescue, as they may relate to this facility when making decisions at an incident involving fire.

Further, fire departments that would respond to an incident at this facility are strongly encouraged to meet with facility representatives to determine ways to minimize an event at the facility and to determine what additional information and factors should be taken into consideration in the event of a fire, should one occur.

The field incident commander shall determine the actual response to an incident and the affected area may vary from the planning vulnerability zone identified in this Plan. Depending on wind speed and direction, the amount of material released and other pertinent factors, the ACTUAL vulnerability zone may be smaller, and in some instances larger, than the credible worst case vulnerability zone identified herein.

The vulnerability zones determined in this Plan are for general PLANNING PURPOSES.

STATE REPORTING REQUIREMENTS:

Wisconsin Statute §292.11 WISCONSIN SPILL LAW

The spill law, Chapter 292.11, Wis. Stats., requires that a person who possesses or controls a hazardous substance or who causes the discharge of a hazardous substance shall notify the department **immediately** of any discharge not exempted by the statute. The Department has a 24-hour toll free number for reporting spills: **1-800-943-0003**.

Chapter NR 706 Wisconsin Administrative Code

Ch. NR 706, Wis. Adm. Code establishes exemptions for small quantity spills of agricultural and petroleum related compounds, as well as substances that have a federal reportable quantity established. These quantities are termed "de minimis" in that below these levels, under the following conditions, state notification of a discharge is not required. While reporting requirements may be exempted, **cleanup requirements remain**. If a discharge meets one of the following de-minimis exemptions **it must be reported to the Wisconsin DNR**:

1. Has not evaporated or been cleaned up in accordance with NR 700 – 726,
2. Adversely impacts or THREATENS to adversely impact the environment,
3. Causes or THREATENS to cause chronic and/or acute human health impacts, or
4. Presents or THREATENS to present a fire or explosion hazard or other safety hazard (including all evacuations)

VII. HAZARD ANALYSIS SUMMARY:

The Onalaska Municipal Well #10 pumping station could have upwards of two employees at the facility during an incident. The facility is located in the northern residential section of the City of Onalaska, on Vilas Street between US Highway 53 and Sand Lake Road.

The chlorine tanks are in the chlorine room, which is located on the east side of the building. The entrance door is marked with a chlorine sign. Six 150-pound cylinders occupy the chlorine room, however only four are attached to the system manifold at a time. All calculations are made using a scenario of a single cylinder release, as only one cylinder is usually handled at a time.

It was determined that the greatest risk of a hazmat incident would occur during the connecting or disconnecting of a single tank from the chlorine injection system.

The vulnerability zone for this facility was based on a worst case scenario for a release of chlorine. The vulnerability zone could be upwards of 2.2 miles. Parameters used in the analysis are as follows:

EHS Chemical: ***Chlorine***

Form: Gas
Container Size: 150 lb.
Concentration: 100%
Parameters used in the hazard analysis:
 Level of Concern: 1/10 IDLH
 Duration of Release: 10 minutes

WORST CASE SCENARIO:

Rural
Wind Speed: 3.4 mph
Atmos. Stability Class: F
Vulnerability Zone: 2.2 miles

RE-EVALUATION SCENARIO:

Rural or Urban: Urban
Wind Speed: 11.9 mph
Atmos. Stability Class: D
Vulnerability Zone: 0.1 miles

VIII. SPECIAL FACILITIES AFFECTED:**Government Buildings**

NAME	ADDRESS	PHONE	CAPACITY
Omni Center	255 Riders Club Road	608-781-9566	3,000
Onalaska City Hall (Includes the Fire Station and Police Department)	415 Main Street	608-781-9530	200

Thomas Farm Park	2514 Thomas Court
Van Riper Park	201 Riders Club Road

IX. POPULATION PROTECTION:

The on-scene commander will make the determination to shelter in place or to evacuate as appropriate. The lead-time for a hazardous materials incident may be very short. Consequently, there may not be time enough for safe evacuation, especially when extremely toxic chemical fumes are involved. An evacuation under these considerations may expose the population to dangerous toxic chemicals and the decision may be made to shelter in place. Preferred areas for protective sheltering would be interior hallways, rooms without windows or exterior doors, enclosed stairways and rooms on the side of the building away from where the hazard is approaching. Doors, windows, and other potential air leaks should be sealed up to prevent toxic fumes from entering.

Experience indicates that shelter space would need to be provided for only 30% of the population within the initial isolation and evacuation zones and the remaining 70% would seek shelter with family and friends outside of the risk zone.

Roles and responsibilities relative to evacuation and sheltering as well as a list of shelters appear in the La Crosse County Emergency Operations Plan, Annex E.

X. SPECIAL CONSIDERATIONS:

The south end of Lake Onalaska and the Onalaska spillway is used seasonally by a large population of boaters and anglers and hunters. In case of an incident, immediate evacuation of a large number of users could be of paramount importance. Personnel should consider wind conditions (direction and speed) when determining to evacuate the Lake Onalaska area.

The local 24-hour National Weather Service Office, County Public Safety Communications (9-1-1 Dispatch Center), and local radio and TV stations could issue warnings to the population. The City of Onalaska maintains a CODE RED telephone alert notification system which could be used to provide information or issue warnings to the public.

NOTE: There are no local ordinances in La Crosse County which mandate specific routes for vehicles carrying Extremely Hazardous Substances (EHSs). Thus, EHSs may be transported over any local, state, or federal highway for which weight limits are met.

XI. DISTRIBUTION LIST:

- Wisconsin Emergency Management – West Central Regional Office
- La Crosse Regional Type II Hazardous Materials Response Team
- Onalaska Fire Department
- Onalaska Water Utility
